⚙ Sample Processes:

- Enter sales order
- Display Stocks in stores
- Show products
- Creates purchase orders
- Manage customers
- Post Invenory
- Print lables

clavis SAP Fiori Retail

Benefits of the Retail-Apps:

- Fiori Launchpad as a **central entry point** for all store and warehouse processes required by store employees
- Simplified customer service through fast and user-friendly applications that draw on the functions of the retail system
- **Role and user-based** allocation of stores
  - Users only see the apps and data that are relevant in their store
  - Fast reregister Springer employees who often change stores
- Products are only listed in the appropriate stores through advanced **assortment management**
- **Characteristics of the article master** (such as generic articles, variants, features) enable the store to provide customers with customized advice
- Predefined **customizing options** for retail apps
- **Extensibility** through use of standard BAPIs in the back end
  - Existing extensions can be easily integrated

Further Functions:

- Connection of cash register systems
- Integration of other SAP systems such as the SAP-CAR system
  - Shelf availability
  - POS data management
- Notification functions via the Notification Area in the Fiori Launchpad
  - Store employees are informed e.g. about new orders and deliveries
- Actions can be managed at store level
  - Use of RFID technology in dedicated Fiori apps.

clavis SAP Fiori Retail

Example app: Display products

- App is individually modifiable in Customizing
- Display of a product image
- Product variants: Display of characteristics such as colors and fabrics for generic articles
- Using the neighboring stores tab, additional stocks can be viewed and the products made available to the customer
- Prices, stocks, delivery and other product details can be displayed at a glance
- All stocks are available in real time

Real-time use - anytime, anywhere

Thanks to the responsive design, the majority of the apps can be used directly on mobile devices, true to the motto "anytime, anywhere, on any device".
