Mobile Fiori Apps for SAP WM

SAP ECC und S/4H

clavis ;

clavisFiori WM

Your company uses the WM warehouse management module on an SAP ECC or SAP S/4HANA and would like to make your mobile applications already future-proof with SAP Fiori?

Our SAP Fiori mobile apps offer you the following features:

- Goods receipt
- Storage (of storage units)
- Stock transfer (bin to bin)
- Queue-controlled confirmation (e.g. for picking)
- Inventory (incl. manual signature)
- Queue assignment
- Orientation to the SAP Fiori Design Guidelines
- Executable in SAP Fiori Launchpad and SAP Fiori Client for Android and iOS
- Optimized for mobile devices with 1D/2D scanning module as well as for smartphones and tablets (scan via integrated camera)
- Neither S/4HANA, nor a HANA database are required to run the ap.
- The app remains operational after your migration to S/4HANA - even in conjunction with SAP Stock Room Management!

The apps are seamlessly connected to the SAP standard using their own OData services.

The screenshot displays the SAP Gateway Service Builder interface. On the left, a tree view shows the project structure with folders for various data models and services. The 'TransferOrderItemSet' folder is expanded, showing a list of OData services. The main area on the right displays a table of these services.

Vorgangsname	Name der Implementierungsklasse	Name der Methode
Aktualisieren	/CLAVIS/CL_WM_TA_QU_PO_DPC_EXT	TRANSFERORDERITE_UPDATE_ENTIT
Anlegen	/CLAVIS/CL_WM_TA_QU_PO_DPC_EXT	TRANSFERORDERITE_CREATE_ENTIT
GetEntity (Lesen)	/CLAVIS/CL_WM_TA_QU_PO_DPC_EXT	TRANSFERORDERITE_GET_ENTITY
<input checked="" type="checkbox"/> GetEntitySet (Query)	/CLAVIS/CL_WM_TA_QU_PO_DPC_EXT	TRANSFERORDERITE_GET_ENTITIES
Löschen	/CLAVIS/CL_WM_TA_QU_PO_DPC_EXT	TRANSFERORDERITE_DELETE_ENTIT
